RESPONSE

Dear Sir:

Responsive to the Office Action mailed December 16, 2003, Applicants respond as follows:

Claims 1-20 were Presented for Examination

All claims stand rejected as being anticipated by the reference entitled "Six Degree of Freedom Sensing for Docking Using IR LED Emitters and Receivers." During a telephone conversation with the Examiner on Friday, the 30th of April, Applicants explained that the authors of the paper are the same as the listed inventors, and, therefore, the cited reference was not an appropriate reference in this matter. Particularly, the rejection under 35 U.S.C. § 102(a) is not appropriate as the invention was not known or used by others in this country or patented or

described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

To support this position, applicants submit herewith the Declaration Under 37 C.F.R. 1.132, wherein each of the inventors acknowledge that all of the applicants are also the authors of the cited article. Particularly, it is noted Mr. Craig Eldershaw was not listed as an author of the cited paper.

The Declaration explains that Mr. Eldershaw did in fact participate in generation of the subject matter of the article in question, but through inadvertent oversight did not have his name included as a co-author.

It is noted that each of the inventors, including an inventor no longer with the subject company, have executed this Declaration.

For the foregoing reason, it is believed the attached Declaration provides facts which show the intent of Mr. Eldershaw as an author.

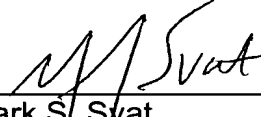

For the foregoing reasons, it is submitted the cited article is an improper reference.

As no other art has been cited to reject the present claims, it is respectfully submitted all claims (1-20) are in condition for allowance. An early notice to that effect is therefore earnestly solicited.

Respectfully submitted,

FAY, SHARPE, FAGAN,
